OUR BUSINESS

OVERVIEW

Anaheim Technology Solutions Plt is an IT software and hardware company delivering innovative IT services to small and mid-sized companies. We are able to provide IT consultation and solutions for our customers from designing the entire IT infrastructure to building up the ideal IT environment for our customers.

“We serve as a link between people, technology and business”

MISSION

To provide exceptional services to customers through innovation and advanced technology.

To help our customers expand their business by providing creative design, development and delivering high-quality solutions that add value and offers authentic competitive advantage to customers.

VISION

To become the leading choice for technology-oriented solutions to all industries. We want to enable and unleash the potential of all our clients.

Integrity

Acting with transparency, commitment and honor without compromising the truth.

Quality

Maintaining a personal commitment to professionalism and integrity, excellence in performance, and standing by our ethical standards through quality control and continuous improvement.

Accountability

We hold ourselves accountable for the quality and adequacy of work performance, and strive to increase productivity and mitigate adverse events to business processes. We make sure assignments are managed with integrity and in compliance with high standards of quality.

OUR SERVICES

A | EXTRA LOW VOLTAGE SYSTEM (ELV)

ELV System stands for Extra Low Voltage System that are deployed in buildings to provide smart and intelligent access control, security as well as infrastructure for data, voice and video transmissions.

Together with specialist partners, we design and install ELV systems that use the best-in-class technologies, deployed with tested and proven project methodologies. Integrated ELV systems serve as a single point of interface for clients, saving time and money while ensuring smooth communication between different systems.

- Closed Circuit Television (CCTV) system
- Structure Data Cable system include LAN cable Cat 5E, Cat6 and Cat7
- Single mode & multi-mode Fibre Optic cable
- IP Phone System
- Access Control System
- Public Address (PA) and Sound System
- Face Recognition System
- Alarm System
- Audio Visual Presentation System
- Meeting System

OUR SERVICES

B | SECURITY SYSTEMS

Anaheim Technology Solutions provides electronic security systems for businesses such as card and door access control systems, CCTV systems, intrusion alarm and biometrics attendance systems. We provide end-to-end integration including planning, designing of IP based network and integration of multiple services. We offer professional CCTV installation to maximize your surveillance solution and improve the security within your premises.

- IP-based Surveillance Network
- Access Control Solution
- Video Management Solution
- Physical Security Solutions

C | HARDWARE & SOFTWARE PROVIDER

Anaheim offers responsive and innovative hardware and software support. Whether you need updated application software or remote and onsite server management, we have the technical tools to meet your needs. We also have long-term partnerships with a number of industry-leading hardware and software providers, such as Lenovo, Dell, HP, Microsoft, H3C, Cisco etc.

Anaheim experts will look over all the hardware and software platforms your company is using, including computers, switches, servers, and software programs to see what is still supported and what isn't. This is a critical first step as out-of-date hardware and software can let threats into your network resulting in costly maintenance. Taking this information into consideration along with your business goals and current pain points, we will establish an infrastructure around your specific needs and objectives, providing you with the hardware and software you need to keep your business running safely and smoothly.

OUR SERVICES

D | EMAIL & WEB HOSTING SERVICES

We offer services to help our customers in setting up their business emails and websites. We will help our customers with setting up domains, integrating with email & web services, configuring email service on customers' end point, and providing maintenance on email and website services if needed.

- Domain registration
- Email Hosting (Exchange, Microsoft365, and IMAP)
- Web Hosting (Shared Hosting and Virtual Private Server)
- Web design service
- Email administration service
- Website maintenance service

E | DEDICATED INTERNET ACCESS (DIA)

Our Dedicated Internet Access (DIA) is designed especially for organizations that require direct connection into the heart of the Internet. Utilizing leased line or Metro-Ethernet circuits with an optional wireless line backup, the DIA service provides a robust connection to the global public Internet infrastructure with minimal latency and high throughput for all end-users. The benefits of having DIA are as below:

- Speed - Delivery of high speed Internet over a Metro Ethernet Network
- Scalability - Bandwidth is scalable without interface and equipment upgrades
- 24 x 7 x 365 helpdesk support
- Dedicated account manager

OUR SERVICES

F | BACKUP SOLUTIONS

Deploying a small business backup solution is the most important step to preventing data loss from ransomware, cyberattacks, accidental file deletion and other threats. But if you're not backing up your data properly, recovering it can be a lot more challenging and costly.

The single best practice for data backup is creating a detailed plan that outlines your company's specific objectives. This is often included within a business continuity plan (BCP) or disaster recovery plan (DRP).

Anaheim is able to provide multiple backup strategy. We plan and implement backup strategy according to customers' budget and needs.

- On-premise primary backup
- Secondary backup
- Cloud backup
- Off-site backup
